## ABOUT ME

An Informatics undergraduate student at ITENAS Bandung specializing in Full-Stack Web Development and systems infrastructure. Highly proficient in engineering applications utilizing PHP Laravel, JavaScript, HTML5/CSS, and relational database management with SQL. Demonstrates a world-class competitive track record as a 2nd Prize Global Finalist in the Huawei ICT Competition in Shenzhen, China, and a 2nd Place National Winner in the Samsung Innovation Campus. Experienced as a Full-Stack Developer Intern at UPT-TIK ITENAS and a laboratory teaching assistant, combined with strong leadership capabilities as the Chief Executive for the Itenas Job Fair 2026.

## AWARDS AND ACHIEVEMENTS

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                      |
